

Monuments have been used for centuries to show our love and appreciation for somebody or something that has touched our lives. Our monuments are used by many different end users: garden clubs; parks; businesses, pet owners; and the general public. Pet owners use our monuments to keep their memories alive, and to pay tribute to their special friend.

Commemorative Monument

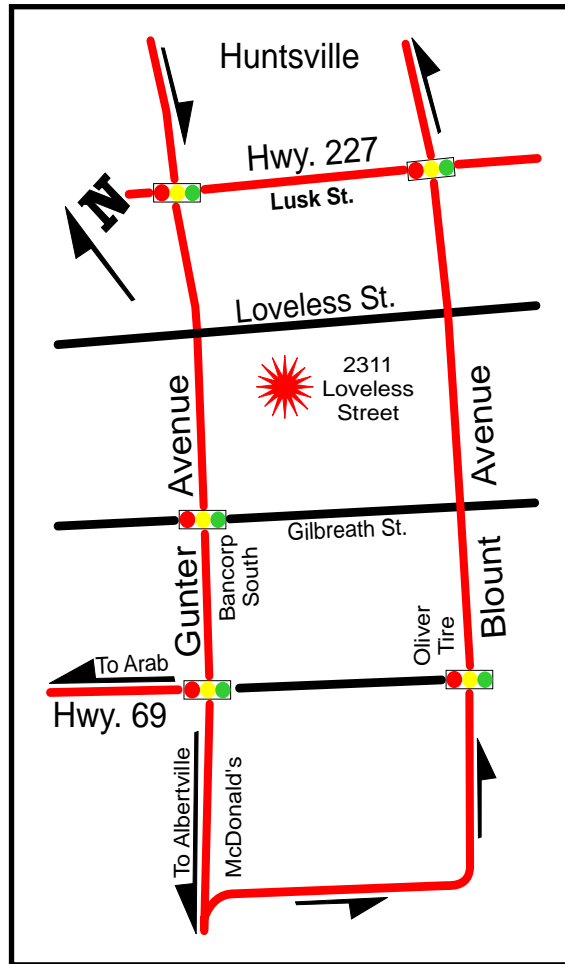

The Commemorative Monuments measure 9-1/2" deep, 15" wide, by 12-1/2" tall. The front area has a recessed area that is 6-1/2" by 9-1/4" where the plaque is mounted. It weighs 7 lbs. when empty and approximately 45 lbs. when filled with sand.

Memory Monument

The Memory Monument measures 8" wide by 7" tall by 5" deep. The plaque mounting area is 4" by 6". It weighs 1 lb empty and approximately 5 lbs when filled with sand.

Both monuments have a filler plug located on the bottom of the monument. The Commemorative Monument plug is 2" in diameter while the Memory Monument plug is 1" in diameter. The monuments can be filled with sand or act as an urn for your loved ones ashes or trinkets.

We will custom engrave your plaque with your personal message, a special poem, and/or an actual image of your loved one. The monuments have the appearance of cut stone or marble. These monuments are UV stable, very strong, extremely durable, and are available in 8 standard colors.
