Commemorative Monument:

The *Commemorative Monument* appears as a cut stone with a tapered top, and is made of Linear Low Density Polyethylene with U.V. inhibitor so it can be displayed indoors or outdoors. The material is tough and high-impact resistant even at low temperatures.

This monument has many uses, including, holding the cremated remains or trinkets of your beloved pet, commemorating or dedicating a special area, tree, or garden site in memory of a loved one.

The monument is approximately 15" wide, 9-1/2" deep, and 12-1/2" high. The monument weighs about 7 pounds empty.

Memory Monument:

The *Memory Monument* weighs 1 pound, and it is 8" wide by 7" high by 5" deep.

The monuments can be personalized through laser engraving. Add a photo of your pet, names, dates, or a favorite saying or poem for a truly unique and personalized monument or memorial.

Both types of monuments are currently produced in 8 colors: Gray Granite, White Marble, Pink Sandstone, Limestone, Black Granite, Millstone, Sandstone, and Green Marble.

Red Alder Urns:

Beautiful Alder Pet Urns, constructed of solid American Red Alder are a touching way to remember your pet. Cremation ashes and/or trinkets can be permanently sealed inside. The Urns are available in three sizes.

The front wood panel or a simulated brass panel (as shown here) can be engraved with a personalized message or a laser reproduced favorite image of your pet. An additional message or name/dates can be added to the top of the Urn also.

Dog Tags:

We have various sizes, styles, and shapes of dog tags that can be laser etched with text and graphics on one side or both sides. We can also custom cut just about any shape from laser engineered plastic.

The dog tags can also be used for personal use with an engraved saying, scripture, or even medical conditions. **Guntersville Laser Engraving** also carries unique 'shoelace' tags that can be used to easily identify you (or your pets and children and/or medical conditions should you be involved in an accident.

Permanently Preserve Photos:

Guntersville Laser Engraving can also create lasting memories by engraving images in a variety of materials, from acrylic to wood and even gold pendants so that you can always keep your favorite pet close to your heart.

Acrylic: Optically brilliant acrylic offers a very unique substrate for preserving images. Standard photograph sizes are available (5 x 7, 8 x 10, etc) as well as unique shapes and sizes for Christmas ornaments and key fobs.

Tile: The image below demonstrates a black and white mosaic composed of six (6), 6" x 6" tiles creating an overall size of 12" x 18". We also have 4-1/4" tiles and can create full color on tiles. Individual tiles can also be created as memorials.

Gold Pendants: Create a special family heirloom that will last through generations to come. A laser engraved photograph on SS or 14K gold encased in watch crystals and placed in one of many different styles of pendants will make the ultimate in lasting gifts.
